## THE ONE-HANDED CLAMP

AdelWiggins 60000-series universal clamp is the most ergonomically engineered clamp available on the market today. The Universal Clamp offers ease of installation through easy to close and locking features. The design facilitates stacking or "butterflying". Installation benefits significantly reduce repetitive motion and carpal tunnel injuries as well as provide significant through-put gains on the assembly line. The clamp has been in service on multiple platforms since 1990 with great success.

## OUTPERFORMS THE MS21919 FOR ALL SIZES

- Under shock and random vibration test per RTCA/DO-160D
- Under resonance dwell test per SAE AS1974 standard

## U.S. AIR FORCE APPROVED

- C130, C5, F16, KC135, Blackhawk and more....

---

*Labor Cost Savings, Increase Throughput,  
Prevent Repetitive Motion Injury, Eliminate  
FOD*

---

## BENEFITS TO YOU

- One-handed installation
- Blind installation
- Easy to close without special tools or tapes
- Locks closed
- Keep hands free
- Stackable
- No spacers or standoffs needed
- Reusable
- Lightweight
- Replaces all MS21919/AS21919 clamps
- Performance validated through testing and in field use
- Design featured on 1,000's of aircraft and engines
