The One-Handed Clamp

Labor Cost Savings
Increase Throughput
Eliminate FOD
Reusable

The One-Handed Clamp

AdelWiggins Universal Clamp series is the most ergonomically engineered clamp available on the market today. The Universal Clamp offers ease of installation through easy to close and locking features. The design facilitates stacking or "butterflying" significantly reduces repetitive motion and carpal tunnel injuries, as well as, provides significant through-put gains on the assembly line. The clamp has been in service on multiple platforms since 1990 with great success.

Outperforms the AS/MS21919 for all sizes

- Under shock and random vibration test per RTCA/DO-160D
- Under resonance dwell test per SAE AS1974 standard

U.S.Air Force Approved

- Meets or exceeds the qualification requirements of AS21919/MS21919 specification
- (PN 60000) Wiring Applications
- (PN 60020) Wiring and Tube Applications
 - One handed install, side locking or top locking
 - Stackable
 - Eliminates potential FOD introduction
 - Decreases installation time
 - Multiple types of cushions and sizes available
 - Available in Neoprene, Nitrile, Fluorosilicone and higher temperature materials
 - Aluminum and Cres band options
 - Navair Approved Wiring Guide - 505
- Military Pedigree
 - Sikorsky
 - Leonardo Helicopter
 - Boeing Helicopter
 - Leonardo Aircraft
 - Lockheed Martin
 - General Atomics
